

## Revolutionary ... innovative and simple

Utmospheric® is a brand new booty innovation for waterproof shoe linings. It marks a new era of performance and sustainability developed through a special patented thermal forming process. Our Utmospheric® laminates are thermo formed into a three-dimensional shape giving the user; a seamless comfortable fit.

## Ready ... to change radically

Previous waterproof production processes were labour intensive, and our patented Utmospheric® innovation has simplified this to the maximum. From labour, material and waste; far fewer resources are consumed. The Utmospheric® booty is recycled and recyclable. Using the Sympatex® membrane for very high functional breathability with maximum waterproofness, the one-piece solution delivers financial, material and production savings in every shoe manufacturing process.

## Step ... Into the next dimension

Explore the functions and advantages of Utmospheric® products! Based on our thermoforming technology, Utmospheric® gives the consumer:

- **3D seamless comfort.**

And Utmospheric®:

- **is production ready.**
- **is a patented process.**
- **no cutting, no sewing, no tape.**
- **Utmospheric® supplies finished mono material booties from our factory in Bavaria, Germany.**
  
- **100% better breathability vs standard laminate**
- **100% waterproof**
- **100% recycled & recyclable**
- **C02 Neutral**
- **PFAS & PTFE Free**
- **Close the Loop with Mono material construction**
- **Off cuts into backing ,foam‘ for laminates & yarn through a partnership with wear2wear®**
